EDUCATION

B.Sc. Software Engineering | Graduated June 2026

University of Business and Technology (UBT), Jeddah

GPA: 4.27 / 5.00 | Second Class Honors

PROFESSIONAL SUMMARY

Software Engineering graduate from the University of Business and Technology (UBT) with expertise in Artificial Intelligence, Cloud Computing, IT Infrastructure, and Software Solutions. Experienced in designing and developing AI-powered platforms, intelligent analytics systems, smart city solutions, fraud detection platforms, and full-stack applications across cybersecurity, fintech, IoT, and career intelligence domains. Demonstrated leadership through technical community roles, national hackathon participation, Formula 1 operations, and research-driven innovation initiatives. Passionate about building intelligent, scalable digital systems aligned with Saudi Vision 2030.

TECHNICAL SKILLS

Programming Languages: Python • Java • JavaScript • TypeScript • SQL • HTML • CSS

Backend & APIs: FastAPI • Node.js • Express.js • REST APIs • WebSockets • API Integration

Frontend Technologies: Next.js • React • Tailwind CSS • Responsive Web Development

AI & Data Science: Machine Learning • Generative AI • Predictive Analytics • Behavioral Analytics • Anomaly Detection • Fraud Detection • Risk Scoring • Explainable AI • Feature Engineering • Model Evaluation • Data Preprocessing

Databases & Data Management: PostgreSQL • MySQL • Prisma ORM • Database Design • Data Modeling

Cloud & Infrastructure: Cloud Computing • Microsoft Azure Fundamentals • AWS Fundamentals • Virtual Machines • Network Fundamentals • TCP/IP • Docker

Software Engineering: Systems Analysis • Software Design & Architecture • Requirements Engineering • Software Testing • UML Modeling • SDLC • Agile Methodologies

Tools & Platforms: Git • GitHub • VS Code • Cursor AI • Microsoft Office

Professional Skills: Leadership • Problem Solving • Teamwork • Communication • Project Coordination • Analytical Thinking • Critical Thinking • Time Management • Adaptability

PROJECTS & EXPERIENCE

SaTr – AI Fraud Detection Platform | Software Engineer & AI Engineer

2025 – 2026

FastAPI • Python • Scikit-Learn • PostgreSQL • Machine Learning • Fraud Analytics

- Collaborated in the design and development of a production-grade AI-powered fraud detection and risk assessment platform that helps financial institutions identify suspicious transactions before execution.
- Contributed across system architecture, backend services, analytics workflows, database integration, and intelligent decision-support capabilities supporting secure financial operations.
- Led the Artificial Intelligence module, including machine learning model development, fraud analytics, predictive modeling, anomaly detection, explainable AI outputs, and hybrid risk-scoring mechanisms.
- Implemented AML rule analysis, blacklist matching, risk classification models, and intelligent fraud detection workflows to support real-time transaction assessment.
- Achieved ROC-AUC performance of 96.04% through the implementation and evaluation of advanced machine learning models.
- Contributed to ongoing research paper preparation and patent development activities associated with the project.

Absher Neuron 2.0 – AI Security Intelligence Platform | Lead Software Engineer & AI Engineer

2025 – 2026

Next.js • TypeScript • FastAPI • PostgreSQL • Prisma • Scikit-Learn • WebSockets • Docker

- Developed a production-grade AI security intelligence platform focused on digital identity protection, behavioral analytics, and predictive security monitoring.
- Implemented behavioral identity profiling, anomaly detection, risk scoring, adaptive authentication, and intelligent threat prediction capabilities designed to proactively prevent account compromise.
- Designed and integrated Triple Verification workflows including Face Verification, Live Camera Verification, and Automated Phone Verification for high-risk authentication scenarios.
- Built real-time monitoring systems, security analytics dashboards, identity intelligence services, and live alerting capabilities for large-scale digital platforms.

Matrix Smart Makkah – Smart City AI Operating System | Lead Software Engineer & AI Engineer

2025

Next.js • TypeScript • FastAPI • PostgreSQL • IoT • WebSockets • Predictive Analytics

- Developed a smart city operating platform integrating transportation intelligence, environmental monitoring, waste management, and emergency response services into a unified intelligent ecosystem.
- Leveraged Artificial Intelligence, IoT infrastructure, and predictive analytics to support city-wide monitoring, forecasting, operational decision-making, and smart resource allocation.
- Implemented smart transportation analytics, environmental intelligence systems, emergency management capabilities, and executive command-center dashboards.
- Built real-time monitoring platforms, forecasting systems, operational analytics modules, and city-wide situational awareness capabilities aligned with smart city initiatives.

Smart Home AI Platform – Intelligent Home Operating System | Lead Software Engineer & AI Engineer

2024 – 2025

Next.js • Express.js • FastAPI • PostgreSQL • Socket.IO • Scikit-Learn

- Developed a full-stack AI-powered smart home ecosystem integrating IoT devices, predictive maintenance, intelligent automation, and real-time monitoring services.
- Implemented machine learning models for forecasting, anomaly detection, optimization, recommendation generation, and intelligent home management.
- Built Digital Twin concepts, analytics dashboards, telemetry systems, device management capabilities, and security monitoring services.

StudentCareer AI Platform – Career Intelligence & Readiness System | Lead Software Engineer & AI Engineer

2024

Next.js • FastAPI • PostgreSQL • Prisma • Scikit-Learn

- Developed an AI-powered SaaS platform focused on career readiness, employability assessment, professional development, and intelligent career planning.
- Implemented resume analysis, interview simulation, skill-gap assessment, career readiness scoring, recommendation engines, and roadmap generation capabilities.
- Built analytics dashboards, intelligent reporting systems, personalized recommendations, and career intelligence services supporting students and graduates.

CERTIFICATIONS & PROFESSIONAL TRAINING

- Professional Certificate Program (PCP) in Project Management Practicals
- Artificial Intelligence Concepts & Advanced Applications (SDAIA)
- Fundamentals of Artificial Intelligence (SDAIA)
- Code Generation and Optimization Using IBM Granite
- Guided Learning Experience: Using Generative AI for Software Development
- CHIPATHON IC Design Training Program
- Introduction to Cloud Computing (IBM)
- Introduction to Data Engineering (IBM)

AWARDS, LEADERSHIP & ACTIVITIES

- Formula 1 Saudi Arabian Grand Prix (2023–2025): Track Line Leader & Fire Marshal Team Member.

- Absher Hackathon Finalist.
- Smart Makkah Hackathon Participant.
- FinTech Hackathon Participant.
- GDG On Campus – Management Team Lead: Organized 10+ technical workshops, supported 5+ community events, and engaged 30+ participants.
- ACM Student Chapter – Vice Leader, Organizing Team: Supervised 15+ members and coordinated technical workshops, interviews, and community activities.
- 90+ Volunteer Hours.
- Research Paper Contributor (In Preparation).
- Patent Contributor (In Preparation).
