EDUCATION

B.Sc. Software Engineering | Graduated June 2026

University of Business and Technology (UBT), Jeddah

GPA: 4.27 / 5.00 | Second Class Honors

PROFESSIONAL SUMMARY

Software Engineering graduate (UBT) specializing in Artificial Intelligence, Cloud Computing, IT Infrastructure, and Software Solutions. Experienced in designing AI-powered platforms, intelligent analytics, smart city solutions, and fraud detection systems across cybersecurity, fintech, and IoT domains. Proven leadership through community roles, national hackathons, and Formula 1 operations — passionate about building scalable digital systems aligned with Saudi Vision 2030.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, WebSockets

Frontend: Next.js, React, Tailwind CSS, Responsive Web Development

AI & Data Science: Machine Learning, Generative AI, Predictive & Behavioral Analytics, Anomaly & Fraud Detection, Risk Scoring, Explainable AI, Model Evaluation

Databases: PostgreSQL, MySQL, Prisma ORM, Database Design & Data Modeling

Cloud & Infrastructure: Microsoft Azure, AWS, Docker, Virtual Machines, Networking (TCP/IP)

Software Engineering: Software Architecture, Requirements Engineering, Testing, UML, SDLC, Agile

Professional: Leadership, Problem Solving, Teamwork, Communication, Critical Thinking, Adaptability

PROJECTS & EXPERIENCE

SaTr – AI Fraud Detection Platform | Software Engineer & AI Engineer

2025 – 2026

FastAPI, Python, Scikit-Learn, PostgreSQL, Machine Learning

- Co-developed a production-grade AI fraud detection and risk assessment platform helping financial institutions flag suspicious transactions before execution.
- Led the AI module: ML model development, fraud analytics, anomaly detection, explainable AI outputs, and hybrid risk-scoring.
- Implemented AML rule analysis, blacklist matching, and risk classification for real-time transaction assessment.
- Achieved **ROC-AUC 96.04%**; contributing to a research paper and patent (in preparation).

Absher Neuron 2.0 – AI Security Intelligence Platform | Lead Software Engineer & AI Engineer

2025 – 2026

Next.js, TypeScript, FastAPI, PostgreSQL, Prisma, Scikit-Learn, Docker

- Built an AI security intelligence platform for digital identity protection, behavioral analytics, and predictive monitoring.
- Implemented behavioral profiling, anomaly detection, risk scoring, adaptive authentication, and threat prediction.
- Designed Triple Verification (Face, Live Camera, Phone) with real-time monitoring dashboards and live alerting.

Matrix Smart Makkah – Smart City AI Operating System | Lead Software Engineer & AI Engineer

2025

Next.js, TypeScript, FastAPI, PostgreSQL, IoT, Predictive Analytics

- Developed a smart city platform unifying transportation, environmental monitoring, waste management, and emergency response.

- Leveraged AI, IoT, and predictive analytics for city-wide monitoring, forecasting, and operational decision-making.
- Built executive command-center dashboards with real-time analytics and situational awareness.

Smart Home AI Platform – Intelligent Home Operating System | Lead Software Engineer & AI Engineer 2024 – 2025

Next.js, Express.js, FastAPI, PostgreSQL, Socket.IO, Scikit-Learn

- Built a full-stack AI smart home ecosystem with IoT integration, predictive maintenance, and intelligent automation.
- Implemented ML models for forecasting, anomaly detection, optimization, and recommendation generation.
- Delivered Digital Twin concepts, analytics dashboards, and real-time telemetry & security monitoring.

StudentCareer AI Platform – Career Intelligence & Readiness System | Lead Software Engineer & AI Engineer 2024

Next.js, FastAPI, PostgreSQL, Prisma, Scikit-Learn

- Developed an AI SaaS platform for career readiness, employability assessment, and intelligent career planning.
- Implemented resume analysis, interview simulation, skill-gap assessment, and roadmap generation.
- Built analytics dashboards and personalized recommendation services for students and graduates.

CERTIFICATIONS & TRAINING

- Professional Certificate Program (PCP) in Project Management Practicals
- Artificial Intelligence Concepts & Advanced Applications — SDAIA
- Fundamentals of Artificial Intelligence — SDAIA
- Code Generation and Optimization Using IBM Granite
- Using Generative AI for Software Development (Guided Learning Experience)
- CHIPATHON IC Design Training Program
- Introduction to Cloud Computing — IBM, Introduction to Data Engineering — IBM

AWARDS, LEADERSHIP & ACTIVITIES

- Formula 1 Saudi Arabian Grand Prix (2023–2025): Track Line Leader & Fire Marshal Team Member.
- Hackathons: Absher Hackathon Finalist, Smart Makkah Participant, FinTech Hackathon Participant.
- GDG On Campus – Management Team Lead: 10+ workshops, 5+ events, 30+ participants.
- ACM Student Chapter – Vice Leader, Organizing Team: supervised 15+ members & coordinated technical events.
- 90+ Volunteer Hours, Research Paper & Patent Contributor (in preparation).
